Krishi Darshan (Hindi: कृषि दर्शन) is an Indian television program on Doordarshan aimed at disseminating agricultural information to rural, farming audiences. It commenced on January 26, 1967 and is one of the longest running programs on Indian television. This application will enable Indian farmers to connect with Krishi Darshan program on Doordarshan and ask their questions related to farming and get the answers through the television program.

Role : Android Developer.

#### Responsibilities:

- Involvement in requirement gathering, designing and development.
- Hosting/participating in design discussions and analyzing the problem in detail to understand the key points.

### Swasthya Samvedana Sena

Client : Digital Sarkar Technosoft Pvt. Ltd.  
Duration : July 13 – August 14  
Programming Languages : Java  
Technologies : Android  
Tool : Eclipse

#### PROJECT DESCRIPTION:

Project 'Swasthya Samvedana Sena' intends to support these frontline health workers by giving them a mobile based tool that puts a wealth of vernacular maternal health information in their hands. The interactive health content covers a range of topics - from infant and adolescent health to pre or postnatal health. As the health workers use the tool in their everyday discussions and meetings with women in their communities, the administration is able to track and monitor their activity, using a web based dashboard, to draw valuable insights from them. The project is supported by District of Sabarkantha, Gujarat. Namaste Life (NGO) with their vast experience in the public health domain has been a valuable content partner.

Role : Android Developer.

#### Responsibilities:

- Involvement in requirement gathering, designing and development.
- Hosting/participating in design discussions and analyzing the problem in detail to understand the key points.
